70% OF PEOPLE THINK FOOT PAIN IS NORMAL...

But pain should never be considered “normal”. If you, a friend or family member have foot pain it is important to be examined by a health care practitioner as soon as possible. Foot pain can initiate a domino effect that can extend to knee, hip and back issues. Furthermore, problems in your knees, hips or back could be the underlying cause of your foot pain! The mechanics of each part of your body are connected, so it is important to visit your health care practitioner to determine what treatment plan is right for you. Treating pain in your feet can yield great benefits to your whole body!

CARE FOR YOUR ORTHOTICS AND THEY WILL CARE FOR YOU.

Custom orthotics can be a key component in keeping you pain free and they require special care to ensure you can continually enjoy their long term benefits. To clean your orthotics, use a damp cloth and mild soap. Allow your orthotics to air dry, as direct heat (eg. a hair dryer) can compromise the adhesive or cause damage to the device. If your orthotics are exposed to a wet environment, remove them from your shoes and allow them to air dry.

If you require a form of odour control, a small amount of baby powder on the topcover can be a great help.

Over time, your orthotics may need a new topcover or refurbishing. Bring your custom orthotics to your health care practitioner for an assessment.

SHOULD I WEAR MY CUSTOM ORTHOTICS ALL THE TIME?

The longer you wear your custom orthotics the more benefit you will get out of them. If your daily activities vary to the extent that you change your footwear, then you should have a second pair of custom orthotics designed for that specific activity (i.e. going to the gym after work).

WHAT KIND OF SHOE DO I NEED FOR MY CUSTOM ORTHOTICS?

For the most part any shoe that has a removable insole will work with your custom orthotic. Just remove the insole that came with the shoe and replace it with the custom orthotic. TOG also offers a carefully-selected line of footwear that can accomodate custom orthotics, as well as custom sandals and clogs that have your prescribed device built right in.

CUSTOM ORTHOTICS AT WORK

In order to maximize the potential benefits of your custom orthotics, The Orthotic Group recommends that you wear your prescribed devices as much as possible. Whether you work in an office or outdoors, in dress shoes or work boots, one of our various orthotic styles can meet your needs and ensure you are supported throughout your day. Consult with your health care practitioner to select an orthotic that's perfect for you!

WHAT IS PLANTAR FASCIITIS?

Have you ever stepped out of bed and felt shooting pain in your heels? You may be experiencing symptoms of plantar fasciitis (fash-ee-eye-tis). This condition is caused by inflammation of the connective tissue that stretches from the bottom of your heel, through your arch and toward your toes. Two common causes of plantar fasciitis are over-pronation (dropped arches) and tight calves, though mechanical imbalances of the foot, increases in body weight and improper footwear can all contribute. Custom orthotics can be a very effective way to alleviate this pain. So ask your health care practitioner about orthotic options to address plantar fasciitis and stretches to prevent it from coming back!

Stability Chart

	A	B	C	D
	1	2	3	4
	5	6	7	8
	9	10		

The amount of stability and support in a running shoe: 1 is the minimum, 10 is the maximum

	Support	Weight	Features
A	Minimal	Lightest	Minimal protection / For neutral, natural stride / Low profile, close to the ground / Some cushioning
B	Neutral-Cushioned	Light Weight	Efficient neutral runners / Good cushioning / Runners with high arches, rigid feet
C	Stability	Mid-Weight	Good solid support / Minimal to moderate pronators / Runners with normal to low arches
D	Maximum Stability	Heavy	Moderate to severe pronators / Flexible, low arched feet / Maximum protection / Rock solid support

Features: Steel Safety Toe
Slip Resistant

6” Geronimo

Black
Size: 7-11, 12, 13
Width: Wide
Orthotic: ActiveFlex
Features: Steel Safety Toe
Slip Resistant

Safety Features and Protection Markings

The green triangle indicates sole puncture protection with a Grade 1 protective toe to withstand impacts up to 125 Joules. Comparable to a 22.7 kg (50 lb) weight dropped from 0.6m. Sole puncture protection is designed to withstand a force of not less than 1200 Newtons (270 lbs) and resist cracking after being subjected to 1.5 million flexes.

The white rectangle with orange Greek letter omega indicates soles that provide resistance to electric shock. Such certified footwear contains a sole and heel design assembly that, at the point of manufacturing, has electrical insulating properties intended to withstand 18,000 Volts and a leakage current not exceeding 1mA.

Recommended Use

For any industry, especially construction and heavy work environments where sharp objects such as nails are present.

For any industry where accidental contact with live electrical current conductors can occur.

Warning: Electrical Shock Resistance deteriorates with wear and in wet environments.

8” Geronimo

Black
Size: 7-11, 12, 13
Width: Wide
Orthotic: ActiveFlex
Features: Steel Safety Toe
Slip Resistant

6” Women’s
Kitson
